Profile

Final-year Information Technology student with internship experience in data analytics and business intelligence. Skilled in Python, SQL, Power BI, and FastAPI, with hands-on experience building AI-powered analytics platforms, interactive dashboards, and data-driven decision support systems. Passionate about transforming business data into actionable insights through analytics and applied AI.

Technical Skills

Languages	Python, SQL, JavaScript
Data Analytics	Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Reporting
Libraries	Pandas, NumPy, Matplotlib, Seaborn
Visualization	Power BI (DAX, KPI Dashboards), Microsoft Excel
Databases	MySQL, PostgreSQL, SQLite
Backend	FastAPI, REST APIs, SQLAlchemy
Frontend	React.js
Developer Tools	Git, GitHub, PowerPoint
AI & CV	Groq API, OpenCV, FaceNet, FAISS

Experience

Data Analyst Intern

June 2025 – July 2025

Calderys India Refractories Ltd., Katni

- Designed interactive Power BI dashboards to monitor 200+ employee assets, improving tracking efficiency by 25% and reducing manual reporting time by 30%.
- Cleaned, validated, and transformed 1,000+ asset and inventory records using Microsoft Excel, reducing data inconsistencies by 20% and improving reporting accuracy.
- Performed exploratory data analysis on asset, inventory, and raw material datasets to support operational reporting, resource planning, and business decision-making.

Projects

NeuroSync AI – Executive Intelligence Platform

[GitHub](#)

Tech Stack: React.js, FastAPI, Python, PostgreSQL, Groq API, Pandas

- Built a full-stack AI-powered business intelligence platform that transforms enterprise datasets into KPIs, forecasts, anomaly detection, risk assessments, and executive insights.
- Developed modular analytics engines for KPI generation, trend analysis, forecasting, recommendation systems, and AI-assisted decision support using Python and Pandas.
- Designed and integrated secure REST APIs, JWT authentication, PostgreSQL database management, PDF report generation, and interactive executive dashboards using React and FastAPI.

PahchanAI – AI-Based Missing Person Detection System

[GitHub](#)

Tech Stack: MERN, Python, FAISS, FaceNet, OpenCV

- Built an AI-powered missing person detection system using FaceNet, OpenCV, and FAISS for facial similarity search.
- Developed a MERN-based platform for managing missing person records and monitoring detection results.
- Designed a scalable architecture supporting efficient data flow, real-time alerts, and CCTV-based identification workflows.

Education

Bachelor of Technology (Information Technology)

2023 – 2027

Samrat Ashok Technological Institute, Vidisha

Affiliated to Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV), Bhopal

CGPA: 7.86 / 10

Certifications

- Data Analytics with Python – NPTEL (2026)
- Business Intelligence and Analytics – NPTEL (2026)

Achievements

- Qualified GATE 2026 (Computer Science & Information Technology) in the first attempt.
- Selected as a participant in Smart India Hackathon (SIH) 2025 among 50+ teams.
- Competed in All India Developers Challenge 2025.
- Participated in HackOverFlow 4.0 and HackOverFlow 3.0.
